Important Reasons

why you should buy Moist-Air Enclosures for your home, store or office.

Decoration and Beauty

Instead of the unsightly radiator the ENCLOSURES add a beautiful piece of furniture to any room. The top of the ENCLOSURE can be used for ornamentation to suit your individual ideas. They protect the walls, woodwork, furniture and hangings. They provide a more efficient and comfortable heat.

Construction

Our ENCLOSURES are custom built, being constructed of the finest cold-rolled steel and from the exact measurement of your radiator and are more efficient with hinged lids and solid backs.

Humidification

Bornmann & Mottershead Moist-Air Radiator ENCLOSURES are furnished with a concealed water pan which provides a moist, healthful heat.

Finish

The ENCLOSURES are finished with life-long spray enamel, baked in our own ovens. They can be finished in white or to match your individual color schemes.
